

Distribution picking containers

Easy pickings

- Allibert Buckhorn DPC's (Distribution Picking Containers) combine the ease of access required for order picking with the protection and security of a returnable distribution container.

- Sliding door combined with 'multi-fold' lid allows easy access to the container when on racking or shelving.

- The sliding door also permits access when stacked.

- Containers stack with the lid closed and nest with lid open - saving valuable space on return transport or when not in use.

- The hinged lid inhibits theft when fitted with tamper-evident seal ref. 00701 at both ends.
- Multiple identification options include card holders on sliding door and at rear (cover ref. 00473), locations for document holder ref. 00509 on sides, pimple pads for easy removal of adhesive labels and areas for bar code labelling.
- DPC's can also be factory fitted with RF Tags.
